GEODETIC SURVEY OF N.S.W.

GEODETIC STATION RECONNAISSANCE and MAINTENANCE REPORT

Wellwood Trig Station

I attended a meeting at this Trig Station on 3rd April,

The owner has done extensive landscaping right up to the base of the concrete pillar on the North-Western side of the Triq.

The Station Summary Card shows that there were two eccentric surface marks located about 4m from the pillar in a North-Easterly and North-Westerly direction. I believe that as a result of the landscaping, these two eccentric marks (Cu Nail in conc and metal plug in stone (Orig 1904 mark)) will be either disturbed or destroyed.

When next this station is visited, an intensive search should be made to determine the status of these two eccentric marks. Contact the owner prior to visiting the Station.

Current Owner: Mr John Healy
